

Here's how you can create new adventures and experiences for children in the Lansing area.

December 2015

When you were in school **did you ever imagine being an astronaut?**

Now, you **can imagine** being a child among a dozen other children on TechTransport launched into space to participate in a mission, to solve medical problems and bring back samples to study on earth.

You can imagine the sounds of zooming through space, the sights of the stars and planets whizzing past your head, can you feel the anticipation and excitement in the air

For you, the experience is in your mind's eye. For thousands of children in the Lansing area, the experience will be real next year.

When you donate to ITEC you provide Lansing area children and youth with exciting, hands-on, learning experiences that get them engaged in STEM learning.

Your gift will be used wisely by ITEC because we collaborate and coordinate with like-minded individuals, schools, businesses, foundations and higher education **to maximize the impact of your gift.**

Your donation will spark imaginations through unique learning experiences throughout the Lansing area.

You will make it possible for the most under-served children to have these experiences.

Don't delay your decision, **make your donation today.** You can make a secure donation at [www.iteclansing.org/donate](http://www.iteclansing.org/donate) or use the enclosed reply card and envelope.

Thank you for contributing to the development of children who can help change the world.

Sincerely,

Patrick Dean, Board President
